EDUCATION

- Bachelor of Technology in Computer Science Engineering (AI & ML)**
AVN Institute of Engineering & Technology, Hyderabad
- 2024-2027
CGPA: 8.2/10

PERSONAL PROJECTS

- Friday - AI Voice Assistant**
AI-powered conversational voice assistant with automation capabilities
 - Developed a Python-based voice assistant capable of answering queries and performing system automation tasks.
 - Implemented Speech-to-Text, Text-to-Speech, wake-word activation, and voice authentication features.
 - Integrated Groq API, Wikipedia API, and custom modules for file search, system monitoring, and intelligent responses.
 - Technology Used: Python, SpeechRecognition, Pyttsx3, Groq API, NLP, n8n Cloud.
- College Predictor Using Rule-Based Algorithms**
Web application for predicting colleges based on rank, category, and region
 - Built a rule-based recommendation engine using conditional filtering and admission criteria.
 - Developed backend services using Flask and integrated MySQL for data management.
 - Implemented responsive user interfaces and dynamic result generation.
 - Technology Used: Python, Flask, HTML, CSS, JavaScript, MySQL.
- Employee Salary Prediction System**
Machine learning application for salary estimation and analytics
 - Developed regression models to predict employee salaries based on multiple features.
 - Built an interactive Streamlit application and visualized insights using Power BI dashboards.
 - Performed data preprocessing, feature engineering, model evaluation, and deployment.
 - Technology Used: Python, Scikit-Learn, Pandas, Streamlit, Plotly, Power BI.

EXPERIENCE

- AI & ML Intern**
Edunet Foundation - IBM SkillsBuild Program
Jun 2025 – Jul 2025
Remote
 - Developed and deployed an Employee Salary Prediction System using Machine Learning techniques.
 - Performed data preprocessing, feature engineering, model training, and evaluation using Python and Scikit-Learn.
 - Built an interactive Streamlit application and visualized insights through Power BI dashboards.
 - Participated in mentor-led sessions and technical masterclasses on Artificial Intelligence and Machine Learning.
- AI & Green Tech Intern**
Shell, AICTE & Edunet Foundation
Jul 2025 – Aug 2025
Remote
 - Worked on sustainability-focused AI projects under industry mentorship.
 - Applied data preprocessing, model evaluation, and optimization techniques for predictive solutions.
 - Collaborated with peers and presented the final project prototype to industry professionals.
 - Gained practical exposure to AI-driven solutions addressing real-world sustainability challenges.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: Python, Java, C++, JavaScript, SQL
AI & Generative AI: Conversational AI, Voice AI, Prompt Engineering, Natural Language Processing (NLP), Generative AI, Machine Learning
Frameworks & Tools: Flask, Django, Streamlit, Git, GitHub, VS Code, Power BI
Voice AI Technologies: Speech Recognition, Text-to-Speech (TTS), Speech-to-Text (STT), Voice Assistants
Databases: MySQL, Firebase (Firestore, Authentication)
Real-Time Systems: API Integration, Event-Driven Applications, Real-Time Data Processing
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management Systems, Artificial Intelligence
Areas of Interest: Conversational AI, Voice AI, Generative AI, Full Stack Development, Machine Learning
Soft Skills: Problem Solving, Ownership Mindset, Team Collaboration, Communication, Adaptability

ACHIEVEMENTS

- Winner - React Hyderabad Workshop**Selected among participants for technical excellence and problem-solving skills.
- Student Coordinator - Vibe Coding Workshop**Managed event coordination, participant engagement, and workshop o
